

baseline

**Quality is coming...
Are you prepared?
06/02/2018**

EU Directive 2013/59/Euratom
Protection against ionising radiation

**Are you always prepared for an
audit?**

Internal clinical audits each year
External clinical audits on a regular base

let us offer you a solution

What is BASELINE?

- Serves as a tool for better compliance with
 - international hospital accreditation & certification systems
 - regulatory inspections for radiation protection and safety
- Assesses your radiology department by quality experts.
- Based on the standards for Quality Assurance Audit for Diagnostic Radiology Improvement and Learning (QUAADRIL, IAEA).
- Compares your actual clinical practice with good practices.
- Benchmarks anonymously your healthcare institutions against other ones on a regional and country-level.

Why BASELINE?

- Assists you in improving quality of care in your radiology department.
- Helps you prepare and increases your success rate for clinical, accreditation and certification audits.
- Provides you with a detailed report of audit findings & observations so that areas of future improvement can be identified.
- Allows you to compare your audit results and activities with other departments and hospitals.
