Analyse & optimize dose
Comply to legislation & DRLs
Raise overall safety & quality

What is DOSE?

- An advanced solution to maintain **patient safety in medical imaging**
- A **vendor-neutral** software that automatically **monitors, evaluates and reports** patient radiation dose
- A valuable tool for continuous **quality improvement** with a commitment to the **ALARA** principle (As Low as Reasonably Achievable)
- An efficient pro-active solution to the labor-intensive task of **regulatory compliance monitoring**

Why DOSE?

- Gives **direct insight** into daily radiation dose, image quality, and performance of your department
- Notifies the user of potential issues with **advanced alert management**
- Provides configurable modality benchmarking to facilitate **optimization tasks**
- Simplifies the **management** of your **protocols**
- Integrates with **national registries**

a solution for your facility
